DPD-2170-60
COPY 1 OF 1

10 March 1960

Dear Dan:

M.I.T

Reference is made to your letter DPD-4788-59, dated 13 July 1959, wherein you enclosed a list of certain non-expendable equipment and requested receipt for all items except item 2, the IF amplifier.

We have recently completed what we believe to be a complete inventory of all equipment accountable for by EG&G. In addition to item 2 mentioned above, we are unable to locate or identify the following:

Item 1. Bridge Hy Alford 1133, PN9214-1, P. O. No. L106556. We have no record of ever having this item. We do, however, carry on our books an Alford Hybridge TP1134, our property number 473/50.

Item 12. 1219A Pulse Amplifier, General Radio, PN 9214-38, P. O. No. L33124. We have one item listed under our PN 373/50. However, it does not have your property number 9214-38 and we are unable to correlate the two numbers.

Item 5. Signal Generator, Hewlett-Packard, PN9214-21. This item was returned to Lincoln Laboratory 23 April 1958, on our invoice C-278.

Receipt is hereby acknowledged for all items of equipment listed in the above-referenced letter, with the exception of items 1, 2, 5 and 12, mentioned above.

CONTAINS SENSITIVE COMPARTMENTED INFORMATION

Approved For Release 2001/07/28 : CIA-RDP64B00187A000700150060-1

We will appreciate any suggestions or additional information you may find concerning the identity of items 1, 2 and 12. We will continue our search for information leading to proper identities and will notify you of any new findings we may uncover.

Very truly yours,

STATINTL
